Travis CI status: [Build Status](#)

# Chapter 1. Introduction

spring-boot magic...

Read github pages [reference documentation](#)

generated by [generator-jvm](#) yeoman generator (java-spring-boot)

# Chapter 2. Implementation

To create starter we need minimal projects structure:

- autoconfigure project: `spring-boot-starter-hello-autoconfigure`
- start project: `spring-boot-starter-hello`
- testing project: `spring-boot-starter-hello-tests`
